INNOVATIONS FOR LEARNING AND TEACHING LANGUAGES
Results of language testing in higher education establishments in France have shown a discrepancy between language proficiency expectations, and the results students obtain.

In view of these findings, the ambition of Innovalangues is to initiate, support and roll out efforts that will consolidate teaching and learning practices first on the Grenoble site, then nationally.

The project initiators believe that significant improvement of currently observed results requires the renovation of practices, anchored in a process of innovation in the language teaching and learning.

This ambitious goal means creating and providing a diverse and highly flexible range of training models, resources and learning pathways that cover a wide range of training needs. The package is rolled out with the support of training professionals on site.

Innovalangues’ learning pathways, using blended or distance learning, will be accessible online. This personalized digital language-learning environment (ENPA) is designed to support online learning and training pathways. It aims to be open, flexible and highly adaptable to all the different contexts encountered in language training.

The main objective of Innovalangues is to contribute significantly to the improvement of language teaching and training practices. In this way, the project is at the service of the entire educational community.

The project intends to offer an online digital ecosystem geared towards the teaching and learning of languages, towards higher education institutions, teachers and students, but also towards the socio-economic world.

The Innovalangues ecosystem will host a community sharing space for trainers and teachers, easy-to-use resources, and training programs all integrated into a personalized digital language-learning environment specifically developed for this aim.
A PERSONALIZED DIGITAL LANGUAGE LEARNING ENVIRONMENT...

SKILLS ASSESSMENT AND FORMATIVE EVALUATION
One of the central objectives of Innovalangues is the creation, scientific validation and development of a Formative Language Assessment System, available to the entire educational community. This specialized system is a set of diagnostic and formative modules that gauges students’ language level based on the Common European Framework of Reference for Languages (CEFR), and proposes formative solutions to improve their skills.

CALIBRATED LEARNING PATHWAYS
Because our project is anchored in academic research, Innovalangues is able to capitalize on advances in language didactics (oral practice, improvement in prosody, mastery of oral and written interactions). Our lengthy experience in digital training at the university level enables us to design learning pathways adapted to different organizations and the specific needs of their language learners.

A HIGH PERFORMANCE TECHNO-PEDAGOGICAL TOOLKIT
The goal of researchers and developers involved in Innovalangues is to offer a techno-pedagogical toolkit that allows education professionals to create learning paths for their students, rapidly and without limitation, from resources offered by Innovalangues. Special attention is placed on resources that allow learners to develop their oral skills (production, comprehension and interaction).

FOR TEACHERS AND TRAINERS:
- Free and easy-to-use resources available online and in the classroom
- Ready-to-use and customizable learning pathways
- Innovative tools for diverse approaches
- A Formative Language Assessment System for free evaluative use

“IMPROVE LANGUAGE LEARNING THROUGH A DIVERSE OFFER OF INNOVATIVE PRACTICES AND METHODOLOGIES”
PARTNERSHIPS

Innovalangues is a multicultural meeting place for partners from research, teaching, training and development, all working together. It’s a crossroads of expertise from different horizons, open to the world, collaborating to improve language learning.

A DIGITAL ECOSYSTEM TO...

⭐ Perfect your English, German, Spanish, Italian, Japanese or Chinese
⭐ Learn a language at your own pace, anytime, anywhere
⭐ Assess your language skills
⭐ Enjoy personalized follow-up throughout your training
⭐ Train with specific models in the CLES format
⭐ Locate resources, training programs and models for education and training
⭐ Develop and share your own resources
⭐ Meet and interact with native speakers
⭐ Participate in building a real language community
⭐ Discover diverse approaches in language didactics: multi-faceted, communicative, action-oriented, intercomprehension, skill-based...
